

#### **Quiz 4 (due 7-27-09)**

#### **Ch. 5,6 of Handbook of Christian Apologetics, and supplemental material in class**

1. Define natural selection
2. What is the difference between microevolution and macroevolution?
3. The author states that evolution is *possible*, but may or may not have actually happened. Do you think that evolution is possible?
4. What problem does the lack of transitional fossils pose for macroevolution?
5. What is the theory of irreducible complexity? What problem does it pose for macroevolution?
6. What is the theory of punctuated equilibrium?
7. What is the theory of intelligent design?
8. How would you answer someone who said that intelligent design is not a scientific (in the empirical, experimental sense) theory?
9. What are two historical objections to the reality of miracles?
10. How would you answer someone who said that, "Miracles are contradictory to science"?
11. What is the problem of evil, in your best interpretation of it?
12. Define original sin and vicarious atonement.
13. What are the five possible solutions to the problem of evil?
14. What is the problem posed if evil is a thing? List a Bible verse that supports the concept that God cannot create evil.
15. What is determinism?
16. How can the problem of evil serve as a way to introduce someone to the Gospel of salvation?
